ch chain, **dc** double crochet (UK tr), **sl st** slip stitch, **sc** single crochet (UK dc), **beg** beginning, **sk** skip, **st** stitch.
2 dc in same st: **both in one stitch**. **ch-1 sp**: the hole under the chain. The hook goes in the hole, never into a chain.
Do not turn: the outside faces you all the time. Ch 3 (counts as dc): it is the first dc; its top is the third chain. **Working in the round**
[ ] 7 times: 7 times in all. ( ) in one place: all of it there. (24 dc, 8 ch-1 sps): the round now has that many; a check, not a step. **How to read a pattern**

Assembly

1. Damp the cover and lay it over the open frame, right side out, the tip of the parasol through the foundation ring, a rib of 3 dc along each rib of the frame. Put a pin through the middle dc of each rib at the tip of the frame rib, in the first round of the edge (the round all in dc), and one halfway up. Draw every gore even and let the cover dry on the open frame.

2. The ring. With 24 in (60 cm) of doubled sewing thread run a stitch in and out round the 16 dc of round 1, draw it close round the tip of the parasol, tie it and hide the ends.

3. The tips. With 12 in (30 cm) of doubled sewing thread for each, sew the middle dc of each rib, in the first round of

the edge, to the hole at the tip of the frame rib: 6 stitches through the hole and under the top of the dc, then two small stitches in one place.

4. The ribs. Work from the inside. For each rib cut sewing thread 5 times as long as the rib, thread the needle to the middle of it and bring the two ends together, so that the doubled thread is 2½ times as long as the rib. Begin with two small stitches in one place in the middle dc of the rib in round 3. Then sew at round 3 and at every 3rd round after it (rounds 3, 6, 9 and so on, the last one round 36 in Small and round 54 in Large): take the needle round the frame rib and under the post of the middle dc of the 3, twice, and carry the thread along the frame rib to the next place. After the last place end with two small stitches in one place in the same dc. The scallops of the last two rounds hang free past the tips.

5. The bow. Tie the ribbon in a bow round the shaft just above the handle.

Finishing

- Weave in all ends at the wrong side with the needle.

In all: 40 rounds.

To find how many balls: divide by the length on your yarn's label and round up. Buy them from one dye lot. The estimate is from the stitches of this size at this gauge.

Notes

- Every round is worked with the right side facing; do not turn.
- A beginning chain counts as the stitch in brackets after it. A ch 1 at the start of a round does not count as a stitch.
- When the next stitch or space of a kind is named, pass over anything else that comes before it. Work into a space round the chain, not into it.
- The sl sts at the start of a round carry the yarn to where the round begins; they are not counted.
- The cover is worked from the hole for the tip of the parasol out to the edge. It has eight gores; between every two lies a rib of 3 dc, one dc over another in every round from round 2 to the first round of the edge.
- In every round from round 2 to the first round of the edge (the round all in dc) the ch 3 at the start and the next 2 dc are the first rib. A rib goes on in the 3 dc of the rib below: the first dc of a round stands on the first dc of the first rib, where the round below was joined.
- After a shell, sk next 3 dc means the last 3 dc of the shell just worked into; sk next 2 dc, dc in next dc means that the dc goes in the last dc of that shell. Where a gore gains mesh, the new dc before a shell goes in the first dc of the shell below. (dc, ch 3, dc) and the fans of the edge go all in one place.
- In the first round of the pineapples the three spaces between two shells are ch-3 sps; in the next round the dc go in the middle one.
- The length of a rib of the frame is measured along the rib from the ring at the top of the shaft to its tip. It is the length of the cover from the middle to the first round of the edge (the round all in dc), which is sewn to the tip; the last two rounds reach past it. A frame whose ribs are up to ½ in (12 mm) longer can be used: the cover gives.
