In a 6 inch hoop the widest satin stitch shape is 1/2 in (13 mm) across. Satin stitches longer than about 12 mm (just under 1/2 in) tend to work loose: divide the shape into sections, or work it in long and short stitch.

Three ways to transfer the pattern

1. Fabric you can see through

Tape page 4 to a sunny window or lay it on a light box, tape the fabric over it and trace the lines with a sharp pencil or a water-soluble pen.

2. Fabric you cannot see through

Lay dressmaker's carbon paper colored side down on the fabric with page 4 on top, tape the layers and trace the lines firmly with a ballpoint pen.

3. Iron-on

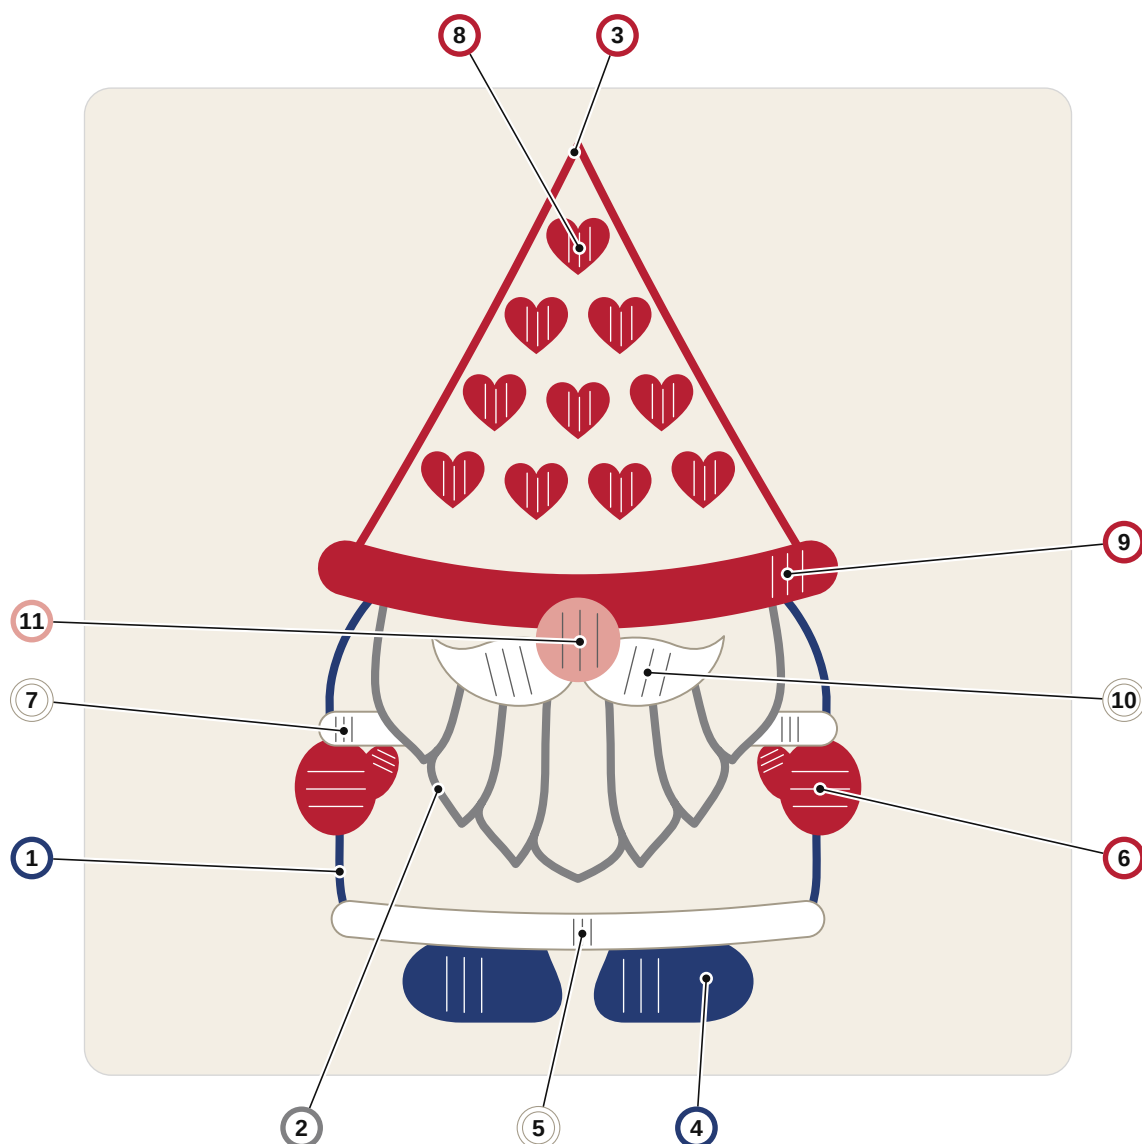

Go over the lines of page 5, the mirrored page, with an iron-on transfer pen, lay it ink side down on the fabric and press with a dry iron.

Pages 4 and 5 are the pattern at actual size. Print them at 100% with scaling turned off.

Work it in this order

- 1 to 3** Start with the coat outline (1), the beard outline and locks of the beard (2) and the hat outline (3) in stem stitch. They run under shapes worked later. Keep the working thread below the line for every stitch. Keep the stitches equal in length, and shorten them on tight curves so the line stays smooth. For a sharp corner, end the line at the corner with the needle down, then start a new line in the new direction.
- 4 and 5** Then the boots (4) and the hem of the coat (5) in satin stitch. Before you take the first stitch down, hold the thread across the shape to set its angle. Satin stitches longer than about 12 mm (just under 1/2 in) tend to work loose: divide the shape into sections, or work it in long and short stitch. Number 4 is wider than that at this hoop.
- 6 and 7** Then the mittens (6) and the cuffs (7) in satin stitch.
- 8** Then the hearts on the hat in satin stitch.
- 9** Then the brim of the hat in satin stitch.
- 10 and 11** Then the mustache (10) and the nose (11) in satin stitch.
